

Tiger GTA

The packs listed below are to build a Tiger GTA using a sierra donor vehicle + 2 x front mk4/5 Cortina hubs & Callipers (or purchase from Tiger new or recon) The kit can be built with a pre 95 zetec engine on carburettors or a new supplied Zetec engine on throttle bodies, of course most 4 cylinder engines could be fitted including bike engines (we do not recommend bike power). All Avon main parts will fit the Tiger GTA – all full kits in a box there is NOTHING ELSE TO PURCHASE!!

Front Cycle Wing Colour _____

A Minimum of £500 Deposit is required on full kits, and £100 on Packs

For all options on Avon if you are purchasing as you go along building using the “stage pack system” please check out our price list or contact our parts dept – for instance in stage pack system you need to order powder coating to your chassis if you wanted it done ? But in full kits it’s done for you!! Again in instrument pack it does not as example have a RPM gauge but in full kits it does and so on.
